Professional Summary:

Computer Science Engineering student with hands-on exposure to **data engineering**, **AI**, **machine learning**, and **data visualization**. I enjoy working with data and building **dashboards** that help turn information into meaningful insights for better **decision-making**. I am a **quick learner** with a **strong problem-solving mindset**, comfortable adapting to new tools and technologies. I stay focused on delivering reliable, well-structured solutions while continuously improving my skills to meet real business and **organizational needs**.

Education:

Qualification	Institution	Year	Score
B.Tech (CSE – AI & ML)	Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore	2022 – Present	7.16CGPA
HSC (12th)	Santaji Mahavidyalaya, Nagpur	2022	69.33%
SSC (10th)	R.S. Mundle School, Nagpur	2020	82.6%

Projects:

- **Novel-Nest**: Developed an **AI-powered** novel generation platform using the **Gemini API** to enhance content creation.
 - Implemented server-side content generation logic with the Gemini API, improving **generation speed** during testing.
 - Added basic API request validation and structured data handling to ensure **stable backend processing**.
 - Improved **backend execution flow** to reduce unnecessary API calls and maintain consistent response times.
- **Movie Recommender System**: Built a content-based movie recommendation system using **Python** and **Streamlit**.
 - Displayed poster images for 5 recommendations using **real-time data** from the TMDb API.
 - Reduced average load time by 1.5 seconds using **Pickle-based model** storage and optimized API calls.
 - Handled API failures with a **retry mechanism** that ensured 100% successful poster retrieval during testing.
 - Tested with a dataset of 5,000+ movies and **deployed** with an interactive Streamlit UI.
- **Live Stock Price Dashboard**: Vibe coded an analysis tool with **real-time data** and predictive features using Streamlit.
 - Displayed **live prices for 10+ stocks** using **Yahoo Finance API** with 1-second update frequency.
 - Trained an **LSTM** model on historical data to predict short-term price trends for selected stocks.
 - Collected and analyzed news headlines using NewsAPI to **generate sentiment scores** for 50+ articles per day.
 - Combined price prediction and **sentiment analysis** to provide a basic signal for **buy/sell decisions**.

Skills and Technologies:

- | | | |
|---------------|--------------------|----------------------|
| ❖ Python | ❖ SQL | ❖ MCP Server |
| ❖ Azure Cloud | ❖ Data Engineering | ❖ Data Visualization |

Certifications:

- **Joy of Computing using Python** – IIT Ropar (NPTEL 2024)

Completed a course on Python fundamentals using practical examples.

Score: 56/100

- **Artificial Intelligence for Economics** – IIT Kharagpur (NPTEL 2024)

Studied machine learning applications in economic modeling with a focus on mathematical foundations.

Score: 52/100

- **Developing Soft Skills and Personality** – IIT Kanpur (NPTEL 2024)

Covered communication, teamwork, and behavioral skills.

Score: 64/100

Participation and Extracurricular:

- Participated in the **Odoo Hackathon** and successfully cleared its first round.
- Participated in **Finance Veda** and went to the final round.
- Participated in a cooking competition organized by **Wonderchef**.
- Participated and won **Maha Cyclathon**.
