Professional Summary

Computer Science Engineer (AI and ML) with hands-on experience in Python development, data engineering, and data-quality operations. Built backend services at AlphaWizz and delivered validation and reconciliation tooling for **TradingHours.com**, a US market-data company, reporting directly to the founder and CEO. **17 pull requests merged** into widely-used open-source Python libraries. Comfortable across the full data lifecycle - REST API integration, ETL pipelines, data modeling, validation, analysis, and visualization. Oracle Cloud Infrastructure certified.

Education

QUALIFICATION	INSTITUTION	YEAR	SCORE
B.Tech (CSE - AI and ML)	Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore	2022 - 2026	7.16 CGPA
HSC (12th)	Santaji Mahavidyalaya, Nagpur	2022	69.33%
SSC (10th)	R.S. Mundle School, Nagpur	2020	82.60%

Experience

- **Data Engineer (Contract) - TradingHours.com** *(Aug 2026 - Sep 2026 | remote - US)*
  - Reported directly to the founder and CEO on data quality for a commercial exchange trading-hours dataset licensed by fintechs and trading firms.
  - Built reproducible Python validation tooling to check holiday dates, trading sessions, and timezone handling across the dataset.
  - Measured calendar accuracy across **39 global markets and 13.6 years** of session data by reconciling published trading calendars against traded volume.
- **Python Developer Intern - AlphaWizz** *(Jan 2026 - Apr 2026)*
  - Developed and maintained Python backend services supporting internal data workflows, REST API integrations, and automation pipelines.
  - Built REST API endpoints with clean interfaces, unit tests, and production-ready error handling.
  - Contributed to code reviews, deployment processes, and documentation alongside senior engineers.

Open-Source Contributions

36 pull requests across 23 repositories as github.com/DMZ22 - **17 merged** into production codebases of widely-used open-source Python libraries.

- **Data engineering and validation:** datacontract-cli, frictionless-py, python-stdnum, schwifty.
- **Financial market data:** QuantLib, yfinance, FinancePy, py-xbrl, exchange_calendars, pandas_market_calendars.
- **Machine learning and anomaly detection:** PyOD, STUMPY, XGI.
- **Entity resolution and screening data:** OpenSanctions, Splink (UK Ministry of Justice).

Projects

- **Phantom - Movie Data and Booking Platform:** Python, REST API, SQLite - live on Render | code.
  - Built a Python web application that integrates the external TMDb REST API to ingest, clean, and serve real-time movie metadata, posters, and ratings.
  - Modeled relational data for bookings, seat selection, and checkout, with a schema designed for data integrity and query efficiency.
  - Designed a stateless request flow with caching, so the application scales horizontally without shared state, and handled upstream API failures gracefully.
- **Stock Price Dashboard - Market Data and Forecasting:** Python, Streamlit, Pandas, Yahoo Finance - code.
  - Built a real-time market data dashboard integrating Yahoo Finance to track equities across multiple instruments.
  - Built ingestion and transformation pipelines computing technical indicators (RSI, MACD, Bollinger Bands) from raw price feeds.
  - Implemented caching and a sub-minute refresh cycle to deliver low-latency visualization without overloading upstream APIs.

Technical Skills

- **Language:** Python
- **Data Engineering:** ETL Pipelines, Data Validation and Reconciliation, Data Modeling, Data Analysis, Data Visualization
- **Frameworks and Libraries:** Streamlit, Pandas, NumPy, Matplotlib, Seaborn, Plotly
- **Databases:** SQLite
- **Practices:** REST API Design and Integration, Unit Testing, Debugging, Code Review, Agile, SDLC

Certifications

- **Oracle Cloud Infrastructure 2025 Generative AI Professional** - Oracle (2025)
- **The Joy of Computing using Python** - IIT Ropar (NPTEL 2024)
- **Artificial Intelligence for Economics** - IIT Kharagpur (NPTEL 2024)
- **Developing Soft Skills and Personality** - IIT Kanpur (NPTEL 2024)
